**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a device with a specific overlapping and sandwich structure, classified in class 257, subclass 128.
- II. Claims 11-26, drawn to a device comprising electronic elements (capacitor, light emitting element), classified in class 257, subclass 163.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because group II (combination) does not require an insulator overlapping, a gate insulating film sandwich, specific aperture ratio or specified percentage of region overlapping. The subcombination has separate utility such as digital camera, printer display, score board display, stadium display, etc.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

A shorten statutory period for response to this action is set to expire thirty days from the mailing date of this communication. Failure to respond within the period for response will cause the application to become abandoned.

#### **Remarks**

Applicant has amended the claims in the response filed on 3/26/03 in order to overcome the restriction requirement. However, the claim languages have not been changed. Group I still describes a specific structure of the self-luminous device such as overlapping, aperture ratio, sandwich feature, etc. that Group II does not specify in its self-luminous device. And Group II does comprise additional elements in its combination such as semiconductor islands, capacitor element, a light emitting element, current supply line, etc. Applicant is respectfully reminded that the invention is defined by the claim language. Merely modifying the preamble does not affect the scope of the invention.
